Subject: Offer of Internship for React.js Development

Dear Abdul Qadeer Sikandar,

We are pleased to offer you an internship position with Infolith under the **React.js Development** programme. Your enrollment has been approved for the **Foundation** track, effective from **July 3, 2026**. This is a **4 weeks** structured internship programme.

This internship is designed to provide structured exposure to practical engineering work, guided learning, project execution, review cycles, and professional documentation. The engagement is educational in nature and is governed by the terms outlined in this letter.

Candidate Name	Abdul Qadeer Sikandar
Internship Track	React.js Development - Foundation
Programme Duration	4 weeks
Mode	Remote / Online learning and project submission
Reporting Channel	Infolith Internship Dashboard and assigned review process
Document ID	INF-2026-OFFER-D71CE189

Please treat this letter as a formal confirmation of your participation. Access to lessons, deadlines, project submission windows, assessment criteria, and document availability will be managed through your internship dashboard.

Terms of Internship

- Nature of engagement:** The internship is a structured learning engagement and does not constitute full-time employment, contractual employment, or a guarantee of future employment.
- Learning requirements:** You are expected to complete the prescribed lessons, assessments, and project submissions within the timelines shown in your dashboard.
- Project submissions:** Work must be original, properly attributed where required, and submitted with functional repository or demo links wherever applicable.
- Review and feedback:** Infolith may review submissions, request revisions, and mark final project outcomes based on quality, completeness, and adherence to instructions.
- Professional conduct:** You are expected to communicate respectfully, respond to review comments, and maintain integrity in all submissions and interactions.
- Confidentiality:** Any private instructions, internal examples, mentor discussions, or non-public material shared during the programme must not be redistributed without written permission.
- Completion documents:** Certificates and recommendation letters are issued only when the relevant eligibility rules for the selected plan are satisfied.

PROGRAMME STRUCTURE

Foundation	Core lessons, assessments, project submissions, and a completion certificate subject to validity rules.
Professional	Extended lessons, advanced projects, review milestones, and completion certificate after all required work is submitted.
Elite	Advanced and real-world project work, final review, mentor/session support where applicable, certificate, and LOR eligibility after final approval.

You should keep your account credentials secure. Any misuse of account access, plagiarism, impersonation, or false submission can lead to cancellation of document eligibility.

Candidate Acknowledgement

I, **Abdul Qadeer Sikandar**, acknowledge receipt of this internship offer for the **React.js Development** programme under the **Foundation** track. I understand that my progress, deadlines, submissions, reviews, and document eligibility will be recorded through the Infolith internship system.

I agree to follow the programme rules, submit original work, respect review decisions, and maintain professional conduct throughout the internship.
